Index to
JOURNAL OF ENGINEERING FOR POWER

Volume 84, 1962

The Journal of Engineering for Power for 1962 was issued quarterly in January, April, July, and October.

Issue	Page Numbers
January	1–152
April	153–222
July	223–306
October	307–402

A

ABRAHAMSEN, R. F.
Flow modeling of furnaces and ducts.... 345

AIR HEATERS
Economy of efficient air preheating with extraction steam..... 1
Enameled cold end surface for low temperature service..... 307

AIRPLANE ENGINES
MU-CYL-JET; the multicylinder turbojet engine..... 131

AIRPLANE WINGS
Experimental investigation of the use of supersonic driving jets for ejector pumps..... 204

ALLOYS
Effect of corrosion by steam at 1100–1500 F upon the heat transfer through superheater tube alloys..... 289
Metallurgical evaluation of superheater tube alloys after 12 and 18 months' exposure to steam at 1200, 1350, and 1500 F..... 258
Scaling behavior of superheater tube alloys in ASME high temperature steam research tests at 1100–1500 F..... 223

ANDERSON, C. H.
Scaling behavior of superheater tube alloys in ASME high temperature steam research tests at 1100–1500 F... 223

ANDERSON, J. H.
Turbocompressor drive couplings..... 115

ARGERSINGER, J. I.
Economy of efficient air preheating with extraction steam (D)..... 8

ARNOW, SAMUEL
Economy of efficient air preheating with extraction steam (D)..... 6

ASH. *See* COAL ASH AND SLAG, OIL ASH

B

BALJÉ, O. E.
Study on design criteria and matching of turbomachines
Part A—similarity relations and design criteria of turbines..... 83
Part B—compressor and pump performance and matching of turbocomponents..... 103

BARR, W. H.
Digital computer program for processing turbine-generator acceptance test data. 295

BENEDICT, ROBERT P.
Generalized approach to one-dimensional gas dynamics..... 49
Some generalizations in one-dimensional constant density fluid dynamics..... 44

BENSON, E. M.
Economy of efficient air preheating with extraction steam (D)..... 6

BERRY, JOHN L.
New England Electric System tests effectiveness of stop-valve bypass in reducing thermal-stress gradients in steam turbines (D)..... 385

BOILER FURNACES
Combustion of crushed, dried Texas lignite and char in steam power boilers... 139

BOILER TESTING
Efficiency determination of marine boilers: input-output versus heat-loss method..... 39

BOILER TUBES
Effects of nucleate boiling versus film boiling on heat transfer in power boiler tubes..... 365

BOILING
Effects of nucleate boiling versus film boiling on heat transfer in power boiler tubes..... 365

BOUNDARY LAYER
Experimental investigation of the use of supersonic driving jets for ejector pumps..... 204

BROCK, J. E.
Effect of corrosion by steam at 1100–1500 F upon the heat transfer through superheater tube alloys..... 289

BROCKEL, W. E.
Corrosion and deposits in low-level economizers..... 313

BROWN, LAURENCE E.
Use of experimental interstage performance data to obtain optimum performance of multistage axial compressors... 187

BRYERS, RICHARD W.
Reactions of magnesium with inorganic constituents of heavy fuel oil and characteristics of compounds formed (D)... 183

BYPASSES. *See* VALVES

C

CARACRISTI, V. Z.
Combustion of crushed, dried Texas lignite and char in steam power boilers... 139

CARLUCCI, N. A.
Generalized approach to one-dimensional gas dynamics (D)..... 67

CARVER, J. R.
Effects of nucleate boiling versus film boiling on heat transfer in power boiler tubes..... 365

CAVITATION
Cavitation criterion for dissimilar centrifugal pumps..... 329

CHAPPELL, R. E.
Scaling behavior of superheater tube alloys in ASME high temperature steam research tests at 1100–1500 F (D)..... 256

CHAR. *See* FUELS

CHIMNEYS
Corrosion problems in stack and ducts... 323

CLARK, C. L.
Metallurgical evaluation of superheater tube alloys after 12 and 18 months' exposure to steam at 1200, 1350, and 1500 F..... 258

COAL ASH AND SLAG
Combustion of crushed, dried Texas lignite and char in steam power boilers... 139

COHEN, L.
Efficiency determination of marine boilers: input-output versus heat-loss method..... 39

COMPRESSORS. *See also* TURBOMACHINERY
Polytropic analysis of centrifugal compressors..... 69, 222
Turbocompressor drive couplings..... 115
Use of experimental interstage performance data to obtain optimum performance of multistage axial compressors..... 187

COMPUTERS
Digital computer program for processing turbine-generator acceptance test data. 295

CORDOVI, M. A.
Metallurgical evaluation of superheater tube alloys after 12 and 18 months' exposure to steam at 1200, 1350, and 1500 F..... 258

CORROSION
Corrosion and deposits in low-level economizers..... 313
Corrosion problems in stack and ducts... 323
Effect of corrosion by steam at 1100–1500 F upon the heat transfer through superheater tube alloys..... 289

CORROSION (*continued*)
Electrochemical cylinder corrosion..... 153
Enameled cold end surface for low temperature service..... 307
Metallurgical evaluation of superheater tube alloys after 12 and 18 months' exposure to steam at 1200, 1350, and 1500 F..... 258
Problems of sealing hydrogen peroxide in a 3000-F environment..... 341
Reactions of magnesium with inorganic constituents of heavy fuel oil and characteristics of compounds formed..... 178
Scaling behavior of superheater tube alloys in ASME high temperature steam research tests at 1100–1500 F..... 223

COUPLINGS
Turbocompressor drive couplings..... 115

CRACKING. *See* THERMAL STRESSES

CSANADY, G. T.
Radial forces in a pump impeller caused by a volute casing..... 337

CURTIS, R. W.
Flow modeling of furnaces and ducts (D) 355

CYLINDERS. *See* STEAM TURBINES

D

DAMAN, E. L.
Enameled cold end surface for low temperature service (D)..... 310

DART, R. S.
Experimental investigation of the use of supersonic driving jets for ejector pumps..... 204

DELEO, R. V.
Experimental investigation of the use of supersonic driving jets for ejector pumps..... 204

DEMING, N. R.
Digital computer program for processing turbine-generator acceptance test data (D)..... 304

DIESEL ENGINES
Electrochemical cylinder corrosion..... 153
Evolution and development of a 900-hp marine diesel featuring ruggedness and serviceability in a 4½ lb/hp package.. 167
Multifuel engine experience..... 159

DREWERY, M. K.
Economy of efficient air preheating with extraction steam..... 1

DRISCOLL, J. M.
Transient loading improvements for large steam-electric generating units (D).... 20

DUCTS
Corrosion problems in stack and ducts... 323
Flow modeling of furnaces and ducts..... 345

DUFFIE, J. A.
Energy balances on a parabolic cylinder solar collector..... 24
Performance of silicon solar cells at high levels of solar radiation..... 33

E

EBERLE, F.
Scaling behavior of superheater tube alloys in ASME high temperature steam research tests at 1100–1500 F..... 223

ECONOMIZERS. *See* HEAT-EXCHANGE EQUIPMENT

EJECTORS. *See* PUMPS—JET

ELDER, REX A.
Flow modeling of furnaces and ducts (D). 356

ENAMELING. *See* METAL COATING

F

FANG, KEN SHOU
Cavitation criterion for dissimilar centrifugal pumps (D)..... 334

(D) denotes Discussion of a paper.

FEELEY, F. G., JR.
Combustion of crushed, dried Texas lignite and char in steam power boilers (D) 149
FESTER, D. A.
Energy balances on a parabolic cylinder solar collector 24
FLOW OF FLUIDS. *See also* FLUID DYNAMICS, GAS DYNAMICS
Flow modeling of furnaces and ducts 345
FLUE GASES. *See* CORROSION
FLUID DYNAMICS
Some generalisations in one-dimensional constant density fluid dynamics 44
FLUID MECHANICS
Radial forces in a pump impeller caused by a volute casing 337
FRITZ, W. A., JR.
Efficiency determination of marine boilers: input-output versus heat-loss method 39
FUELS
Combustion of crushed, dried Texas lignite and char in steam power boilers... 139
Electrochemical cylinder corrosion 153
FURNACES
Flow modeling of furnaces and ducts 345
Use of visible light models for the study of radiant heat transfer in furnaces 358

G

GAS DYNAMICS
Generalized approach to one-dimensional gas dynamics 49
GASES
Polytropic analysis of centrifugal compressors 69, 222
GILLETTE, ROGER
Performance of silicon solar cells at high levels of solar radiation (D) 38
GOLDBERG, S. A.
Use of visible light models for the study of radiant heat transfer in furnaces 358
GOVERNORS
New England Electric System tests effectiveness of stop-valve bypass in reducing thermal-stress gradients in steam turbines 372
GRAMES, L. D.
Enameled cold end surface for low temperature 307
GROH, FRED G.
Use of experimental interstage performance data to obtain optimum performance of multistage axial compressors. 187

H

HARPER, J. D.
Combustion of crushed, dried Texas lignite and char in steam power boilers (D) 150
HEAT-EXCHANGE EQUIPMENT. *See also* STEAM SUPERHEATERS
Corrosion and deposits in low-level economizers 313
HEAT TRANSFER. *See also* STEAM SUPERHEATERS
Effects of nucleate boiling versus film boiling on heat transfer in power boiler tubes 365
Use of visible light models for the study of radiant heat transfer in furnaces 358
HERSHEY, A. E.
Reactions of magnesium with inorganic constituents of heavy fuel oil and characteristics of compounds formed (D)... 185
HIGH-TEMPERATURE RESEARCH. *See also* STEAM SUPERHEATERS
HUFFCUT, H. W.
Enameled cold end surface for low temperature service 307
HUGHES, A. J.
Transient loading improvements for large steam-electric generating units (D).... 21
HYDROGEN PEROXIDE. *See* SEALS

I

IMPELLERS
Cavitation criterion for dissimilar centrifugal pumps 329
Radial forces in a pump impeller caused by a volute casing 337
ISLEY, WALTER F.
Multifuel engine experience 159

(D) denotes Discussion of a paper.

J

JACKSON, R. L.
New England Electric System tests effectiveness of stop-valve bypass in reducing thermal-stress gradients in steam turbines 372
Transient loading improvements for large steam-electric generating units (D) 22
JET ENGINES. *See* AIRPLANE ENGINES
JETS. *See* PUMPS—JET

K

KARLSSON, HILMER
Corrosion and deposits in low-level economizers (D) 321
KLAPPER, J. A.
Metallurgical evaluation of superheater tube alloys after 12 and 18 months' exposure to steam at 1200, 1350, and 1500 F (D) 288
KOVATS, A.
Vibration of vertical pumps 195

L

LANDERS, W. S.
Combustion of crushed, dried Texas lignite and char in steam power boilers (D) 150
LIGHT. *See* MODELS
LIGNITE. *See* COAL ASH AND SLAG, FUELS
LOF, G. O. G.
Energy balances on a parabolic cylinder solar collector 24
LORENZINI, R. A.
Economy of efficient air preheating with extraction steam (D) 7
LUBRICATION
Electrochemical cylinder corrosion 153

M

MACALUSO, CHARLES A.
Stress analysis of a radial-flow rotor (D).. 130
MCCLELLAND, D. H.
Performance of silicon solar cells at high levels of solar radiation (D) 38
MAGNESIUM
Reactions of magnesium with inorganic constituents of heavy fuel oil and characteristics of compounds formed... 178
MANEATIS, G. A.
Digital computer program for processing turbine-generator acceptance test data. 295
MANIFOLDS
Reducing thermal stress in turbine cylinders subjected to cyclic service 389
MARINE ENGINEERING. *See* BOILER TESTING, DIESEL ENGINES
MATT, R. J.
Problems of sealing hydrogen peroxide in a 3000-F environment 341
METAL COATING
Enameled cold end surface for low temperature service 307
METALLURGY
Metallurgical evaluation of superheater tube alloys after 12 and 18 months' exposure to steam at 1200, 1350, and 1500 F 258
MOCHEL, GORDON C.
Vibration of vertical pumps (D) 203
MODELS
Flow modeling of furnaces and ducts 345
Use of visible light models for the study of radiant heat transfer in furnaces 358
MULTICYLINDER ENGINES. *See* AIRPLANE ENGINES
MUMPER, H. D.
Combustion of crushed, dried Texas lignite and char in steam power boilers... 139

N

NILES, W. D.
Reactions of magnesium with inorganic constituents of heavy fuel oil and characteristics of compounds formed 178

O

OBER, JOHN L.
Corrosion problems in stack and ducts (D) 326
OIL ASH
Reactions of magnesium with inorganic constituents of heavy fuel oil and characteristics of compounds formed 178
OIL FUEL
Reactions of magnesium with inorganic constituents of heavy fuel oil and characteristics of compounds formed 178
ORNING, A. A.
Use of visible light models for the study of radiant heat transfer in furnaces 358

P

PATTERSON, R. C.
Flow modeling of furnaces and ducts 345
PFEIFFER, C.
Performance of silicon solar cells at high levels of solar radiation 33
PHILLIPS, N. D.
Reactions of magnesium with inorganic constituents of heavy fuel oil and characteristics of compounds formed (D).. 185
PINNES, R. W.
MU-CYL-JET; the multicylinder turbojet engine 131
POLYTROPIC ANALYSIS. *See* COMPRESSORS
POWER PLANTS. *See also* SOLAR ENERGY
POWER PLANTS—STEAM
Combustion of crushed, dried Texas lignite and char in steam power boilers... 139
Economy of efficient air preheating with extraction steam 1
Transient loading improvements for large steam-electric generating units 9
PRICE, JAMES T.
Flow modeling of furnaces and ducts (D). 356
PUMPS. *See also* TURBOMACHINERY
Problems of sealing hydrogen peroxide in a 3000-F environment 341
Vibration of vertical pumps 195
PUMPS—CENTRIFUGAL
Cavitation criterion for dissimilar centrifugal pumps 329
Radial forces in a pump impeller caused by a volute casing 337
PUMPS—JET
Experimental investigation of the use of supersonic driving jets for ejector pumps 204
PUTNAM, A. A.
Flow modeling of furnaces and ducts (D). 357

R

RADIATION. *See* SOLAR ENERGY
RAMJETS. *See* PUMPS
REBELLO, W. J.
Effect of corrosion by steam at 1100–1500 F upon the heat transfer through superheater tube alloys 289
REID, WILLIAM T.
Combustion of crushed, dried Texas lignite and char in steam power boilers (D) 151
Enameled cold end surface for low temperature service (D) 310
REYNOLDS, ROBERT L.
Transient loading improvements for large steam-electric generating units (D).... 22
RICHMOND, JOSEPH C.
Enameled cold end surface for low temperature service (D) 311
ROSE, R. E.
Experimental investigation of the use of supersonic driving jets for ejector pumps 204
ROTORS
Stress analysis of a radial-flow rotor 124
RUTHERFORD, J. J. B.
Metallurgical evaluation of superheater tube alloys after 12 and 18 months' exposure to steam at 1200, 1350, and 1500 F 258

S

SALEMANN, VICTOR
Cavitation criterion for dissimilar centrifugal pumps (D) 335
SANDERS, H. R.
Reactions of magnesium with inorganic constituents of heavy fuel oil and characteristics of compounds formed 178
SCALING. *See* CORROSION, STEAM SUPERHEATERS
